 The indicated allowability of claims 1-7, 18, 19, 22 and 23 is withdrawn in view of the newly discovered reference(s) to Lange and a broader reading of the claims.
 Rejections based on the newly cited reference(s) follow.

Page 2

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-3, 6 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lange.

Re claim 1, for example, note that Lange discloses a washing system comprising a frame 14, a movable platform, 38 see fig .3, having a left end and a right end, the movable platform being (i) capable of vertical movement relative to the frame, (ii) suspended from above the frame proximate one end, the top end and (iii) supported from below the frame generally proximate the opposite end, the bottom end and one or more nozzles 200, the one or more nozzle operatively coupled to the movable platform. As for the intended use of washing a vehicle, the same has not been afforded the weight of a limitation since the body of the claim fails to recite any limitations that give life and meaning to the intended use of washing a vehicle (see MPEP 2111.02 where the is stated that "in apparatus, article and composition claims, intended use must result in a structural difference between the claimed invention and the prior art to in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim").

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 4 and 5, 18, 19, 22, 23, 94 and 95 rejected under 35 U.S.C. 103(a) as being unpatentable over Lange.

Claims 4 and 5 define over Lange only in the recitation of the non-extensible elongated member being a belt or chain (Lange discloses a cable). However, as per MPEP 2144.06, the same are deemed to be the functional equivalents of each other and thusly no patentably distinction is deemed to exist.

- 6. Claims 18, 19, 22, 23, 94 and 95 rejected under 35 U.S.C. 103(a) as being unpatentable over Lange in view of either Japan 5-105040 or Payne et al.

  Claims 18, 19, 22, 23, 94 and 95 define over Lange only in the recitation of the turbo nozzle. Japan'040 and Payne disclose the use of turbo nozzle in a washing system. It therefore would have been obvious to one having ordinary skill in the art to modify the nozzle in Lange, to be turbo nozzles as taught by either Japan'040 or Payne for the purpose of intensifying the cleaning process.
- 7. Claims 8-17, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. Claims 25-31, 33, 35, 36, 37, 38 and 97 are allowed.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached M-F from 5:30 a.m. to 2:00 p.m. and some Saturdays from 5:30 a.m. to 11:30 a.m.

The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application should be directed to TECHNOLOGY CENTER 1700 (571) 272-1700.

Any inquiry for missing parts of this Office Action (copies of references, pages, forms etc.), contact the OFFICE MANAGER Ms. Sandra Sewell (571) 272-1047.
